

## SINGLE READING DIGITAL SYSTEM

Digital controllers for measurement and control of a single parameter, with temperature reading (° C or ° F).

An accurate design has allowed to build on a series of instrument easy to program.

LDS and LDS PLUS series are controlled by an "ENCODER".

Working mode can be set:

- on / off
- pulse proportional \*
- proportional PWM \*
- fixed PWM \*
- PID (only on LDS PLUS).

Instruments connected in a network (up to 31 instruments) can be remotely controlled.

Combined with probes and probe holders, they can be assembled on panels to have a complete turnkey control system.

\* not on LDSTORBH.

R3-06-20

#### REMOTE CONTROL

Remote control is available with ETHERNET or GSM/GPRS configurations.

Remote control via: [www.ermes-server.com](http://www.ermes-server.com).

#### SOFTWARE

English and French software available. Ask for Deutsch.

#### CUSTOMIZATION

Instruments can be customized with client logo on frontal panel.

#### STAND-BY AND FLOW CONTROL INPUT

#### PERMANENT DATA STORAGE (WITHOUT BATTERY)

System log on display.

#### AUTOMATIC TEMPERATURE COMPENSATION

With PT100 temperature probe.

#### DELAY

Programmable delay at dosing start-up (up to 60 minutes).

#### ALARMS

Alarms for: damaged probe; max dosage, flow, threshold, level (double level on LDS PLUS).

#### DISPLAY

Probe readings, alarms notification, network status (Ethernet; USB, GSM/GPRS) are shown on display.

#### PROBE READOUT MENU

#### mA OUTPUT

As option.

#### WiFi Remote Control

As option.

#### ONLY FOR LDS PLUS

#### PROBE CLEANING

To obtain reliable results it is possible to connect a cleaning system, for example a probe cleaning system.

#### CIRCULATION PUMP

This function allows to supply a water circulation pump into the intake pipeline, increasing pressure.

#### MODBUS

Modbus is a serial communication protocol for connecting instruments to other devices on RS485 network. Available as standard on LD models, as option on LD PLUS.

#### mA WATER METER INPUT

As option.

#### ALARM RELAIS

230 VAC output alarm.

#### DOUBLE SETPOINT

Relais set for 2 setpoint.

#### mA OUTPUT

<b>MODBUS</b>	Connection to other devices (PLC) via RS485	PLC plant management	/	PLC connection output for reading and modifying parameters

You can **CUSTOMIZE** configurations adding external modules.

**MIXED CONFIGURATIONS** allows to connect instruments to ERMES software in multiple ways: directly, locally and remotely. Those configurations extend connection capacity.

If you already use EMEC instruments and you want use ERMES web application, contact our **customers service**.
