MIXERS

Data Sheet

FEATURES

- The mixer is used with size tank from 120 l to 1000 l.
- The gear box (lubrification free) is coupled to the tank fixing flange.
- The main axis is made in stainless steel and covered in PVC.
- The seal against chemical vapour is a Fluorocarbon rotary seal inserted between the flange and the PVC cover of the shaft. This protects the gear box and the motor from chemical vapour.

EMEC supplies MIX with three different speeds: 65 RPM, 200 RPM and 1400 RPM.

The MIX shaft length can be customized to fit different size tanks.
